

Belt Drive To Direct Drive

WE KNOW WHAT'S BEST FOR YOU

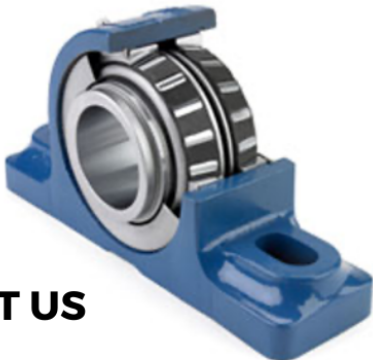

- Reduce Operating Cost
- Less Preventative Maintenance

NORD Gear Drive

- High gear efficiency contributes to reduced operating costs.
- High quality gearing delivers quiet, trouble free transmission of torque to the output shaft.
- Torsionally rigid UNICASE cast iron housing.

DIRECT DRIVE

- More energy efficient – no energy is lost with belt slippage.
- Quieter because there's not squeaking / skidding of the belt.
- Little to no maintenance.

MICROPOLY® FILLED BEARINGS

- The MicroPoly fills the space between the rolling elements and races in a bearing, providing constant and consistent lubrication.
- There is no need for additional lubrication during the life of a MicroPoly filled bearing.
